# Ana Quirosa

## Front-End Developer | Graphic Designer

## SUMMARY

Motivated and dedicated **developer** with a keen interest in creating user-friendly and responsive web applications. Actively seeking opportunities as a Frontend Developer to leverage my skills and contribute to a dynamic, collaborative team environment. While I excel in frontend development, I'm also eager to expand my horizons in full stack development.

## EXPERIENCE

**Current**
**07/2022**

### Co-Founder
Headintheclouds

- Design and develop visually appealing website to align with brand guidelines and style standards.
- Write blog articles on a variety of topics related to technology and web development.
- Build real-world use cases/projects to help students learn web development through practice.
- Collaborate with other team members to ensure the tech community aligns with brand voice and objectives.
- Design and format eBooks using Adobe Creative Suite.

**04/2023**
**08/2021**

### Web Content Manager and Developer
Srta. Rottenmeier Estudio de Arquitectura

- Creating and editing high-quality visual content for various mediums, such as websites, social media, and marketing materials.
- Design and layout magazines, books, and marketing materials such as brochures and posters.
- Designing and developing visually appealing websites that align with brand guidelines.
- Collaborate with developers and other departments to ensure the website effectively communicates the brand message and achieves business objectives.
- Analyse and interpret data from Google Analytics to track traffic, engagement, and SEO performance.

**06/2020**
**01/2020**

### UX/UI Designer
UCAM Universidad Católica San Antonio de Murcia

- Create visually stunning, user-centric designs that enhance the user experience for students, faculty and staff.
- Research and analysis of user needs to develop wireframes, prototypes and user flows that align with user expectations and university objectives.
- Colaborate closely with developers and other departments to ensure the designs are implemented correctly and achieve business objectives.
- Create responsive layouts that work seamlessly across multiple platforms and devices.
